"DUPPETS look like and have the outstanding characteristics of the people who make them and work with them." Miss Edith Keeler, Mariou's authority on puppetry, said when inter-viewed recently. Miss Keeler has the only known pupper show between Cleveland and Columbus, and is quite proud of her handiwork. ..

Pappets are very popular in the east, and their popularity is just spreading in the big cities the country. The fascination of these little dells that will do strange and uncannily human things when a string is pulled, is easily understood after a talk with Miss Keeler,

As a small girl, when dells are usually uppermost in little girl's minds, this young woman was interested in building thingshouses, furniture, etc. This she continued to like and when she entered the Berkshire. fails to remove dandruff completely and that is to dissolve it. Then you

destroy it entirely.
To do thus, just get about four onnees of plann, ordinary liquid aryon; apply it at night when retiring; use enough to moisten the

scalp and rub it it gently with the taiger tips. By morning, most, if not all, of our dandruff will be gone, and two or three more applications will com-

pletely dissolve and entirely destroy every single sign and trace of it, lustrous, glossy, silky and soft, and no matter how much dandruff you look and feel a hundred times better

and diaging of the scalp will stop you will need. This simple remedy instantly, and your hair will be has never been known to fail.

#### White for Safety

WRECKING service operation two service trucks here has painted both white. And for a good;

The white surface of the truck entebes and reflects the rays of automobile headlights at night, when the trock is on a call, or is pulling an unfortunate motorist from the ditch. No matter what the weather conditions are, the while trucks are much more visible at night than a dark colored one. This is essential, as wrecking cars are often placed in poeltions while removing cars from ditches, that endanger other traffic.

The white color carries with it sereral disudvantages. It makes it 10 times harder to keep the truck clean. It is also a difficult manner to naint a car entirely white, as several coats of paint must be used to cover the former coatings of darker paints.

WASHINGTON, Jan. 7-The attle tude of some of the leading railroad magnetes of the country toward the gigantic plan of the interstate commercy commission to consolidate the railroads into 10 major systems may be revealed within the next few days. it was indicated today.

liver since the commission announced its plan two weeks ago there has been a heavy silence on the part of railread executives regarding the merits or demerits of the consciidation plan. With one or two exceptions, notable that of L. F. Lorce. president of the Delaware & Hudson. who was left out of the picture and who derided the idea of giving termical facilities to all and sundry in the different allocations, the magnates-bave refrained from commenting on:

Now comes the announcement that; the Van Sweringen interests, which fared exceedingly well in the proposed plan, will renew negotiations with the Baltimore & Ohio about consolidation plans. The New York Central and the Pennsylvania will also be parties to these negotiations, but no mention has been made of the Wabash-Scaboard plan which the commission has designated as No. 7, as being par-ticipants to any of these negotiations.

# For COLDS

We all catch colds and they can make us miscrable: but yours needn't last long if you will do this: Take two or three tablets of Bayer Aspirin just as soon as possible after a cold starts. Stay in the house if you can-keep warm. Repeat with another tablet or two of Bayer Aspirin every three or four hours, if those symptoms of cold persist. Take a good laxative when you retire, and keep bowels open. If throat is sore, dissolve three tablets in a quarter-glassful of water and gargle. This soothes inflammation and reduces infection. There is nothing like Bayer Aspirin for a cold, or sore throat. And it relieves aches and pains almost instantly. The genuine tablets, marked Bayer, are absolutely harmless to the heart.

#### How French Guard Their Gold.

A Paris cable discloses that the stock of gold of the Dank of France, which that institution has been so zealou-ly engaged in augmenting for the past six or eight months with the design of attaining a parity of influence with the Bank of England in world unance, now amounts to almost \$2,000,000.-000, and there is the further disclosure that it costs, the bank approximately \$1,000,000 a year to guard it.

The system utilized by the Bank of Franco is as unique at it is complex. The way of it is said to be without duplicate the world over. The precautions taken are so unlike any utilized over here that they carry interest.

Unlike most great financial institutions.

the Bank of France keeps the bulk of its gold in a great storehouse near the bank of the Seine, the gold being deposited in an underground vault under what is practically a fortification, the workings of the vaults being kept a secret. The gold lies behind steel and concrete wa'is which are six feet in thickness and surrounded by a maze of corridors, bidden stairways, blind ballways and endless pits, all being below the level of the river. To unlock the main door, which is of steel and five feet thick, requires the simultaneous use of three keys handled by three different men at three different stations.

The entire vault is surrounded by a most the sides of which are polished steel, permitting of no hand or foot holds. Should an attempt be made to swim the most, the swimmer would meet instant death if he touched the walls, which are heavily charged with electricity. There is but one approach | popularity of King Alfonso is appreciating , to the vault and it is down a long stone staircase and through three heavy doors. Even should an intruder successfully pass the most and all these, he would meet death either by failing through tilting traps in the floor or by being boiled, gassed or drowned, as pipes are assanged to fill the corridors with steam, tear gas or water at the will of the guard, which numbers about 100 men. And should an intruder escape the vigitance of the guard and all these deathtraps, and gain entrance into the gold room, the heat of his body would cause a sensitive apparatus there. in to ring bells in all parts of the storehouse and over the bank building and tons of the stone ceiling of the stone starrease would drop and entomb the man or men who thus

gained entrance. The French reverence for gold may be judged by the protection which the Bank of France has given its accumulation. It would be next to impossible to imagine an American
